

QUICKSTART GUIDE

Components

Pump

Large volume adaptor

Small volume adaptor

Pail adaptor

Extension tubing

Rescue Concentrate:
5 Gallon Pail

How to use Rescue™ Concentrate Pail with a dispensing pump

STEP 1 Pull up the flexspout on your Rescue pail, and remove the yellow cap. Wearing gloves, remove the seal.

STEP 2 Screw the pail adaptor onto the flexspout, until it is fitted tightly to the base of the pail.

STEP 3 Insert the extension tubing onto the outlet on the bottom of the pump. Although extension tubing is provided, only one single tube is required due to the size of the pail.

STEP 4 Insert the pump into the pail, and screw into the pail adaptor until tight.

QUICKSTART GUIDE

STEP 5 Prime the pump by moving the handle up and down until Rescue Concentrate is drawn out.

Use a bucket or large container to catch any concentrate.

If you need to discard the concentrate, dilute the concentrate with water, then pour the diluted product slowly down the drain with running water.

STEP 6 Add the snap-on volume adaptors provided to adjust the pump delivery volume.

- For a **1:16 dilution**, **do not use any adaptors**. Each pump should deliver **8 oz. of concentrate** (to add to 1 Gallon of water).

- For a **1:64 dilution**, use **both the large and small adaptors** provided. Each pump should deliver **2 oz. of concentrate** (to add to 1 Gallon of water).

Use a measuring cup to confirm that the correct volume is dispensed.

Troubleshooting Tip

Product isn't coming out of the pump

It may take longer than expected to prime the pump especially if you need to re-prime the pump. Remove the snap-on adaptors and move the handle up and down until concentrate is drawn out.

Desired Dilution Ratio	Amount of Rescue Concentrate to add to 32 OZ OF WATER (ex: Spray Bottle)	Amount of Rescue Concentrate to add to 1 GALLON OF WATER (ex: Pail)	Amount of Rescue Concentrate to add to 5 GALLONS OF WATER (ex: Mop Bucket)
1:16	2 oz	8 oz	40 oz
1:32	1 oz	4 oz	20 oz
1:64	0.5 oz	2 oz	10 oz
1:128	0.25 oz	1 oz	5 oz
